Question

The radius of convergence of the series

$$\sum_{n=0}^{\infty} 3^{n+1} z^{2n}, \quad z \in \mathbb{C}$$

is ?

(GATE MA-28 (2022))

Solution:

Parameter	Description	Value
$X(z)$	Given Sum	$\sum_{n=0}^{\infty} 3^{n+1} z^{2n}, \quad z \in \mathbb{C}$
$x(n)$	Inverse Z transform of $X(z)$?

TABLE 1: GATE MA-28(2022)

On comparing $X(z)$ with Z-transform formula

$$x(n) = \begin{cases} 0 & , \text{odd } n \\ 3^{\frac{n+1}{2}} & , \text{even } n \end{cases} \quad (1)$$

Now,

$$X(z) = 3 \sum_{n=0}^{\infty} 3^n z^{2n}, \quad z \in \mathbb{C} \quad (2)$$

$$= 3 \sum_{n=0}^{\infty} (3z^2)^n \quad (3)$$

For Radius of Convergence,

$$|3z^2| < 1 \quad (4)$$

$$|z| < \frac{1}{\sqrt{3}} \quad (5)$$

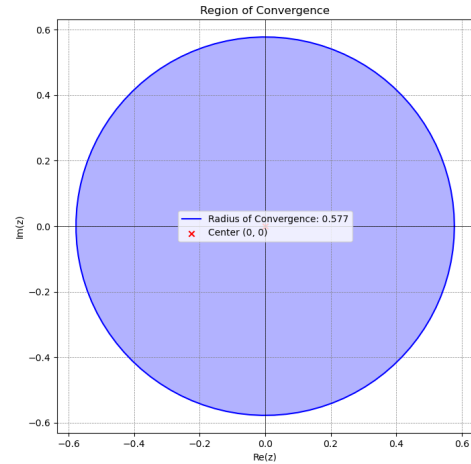

Fig. 1: ROC - $|z| < \frac{1}{\sqrt{3}}$
